SKILLS MATRIX

UI/UX DESIGN

Wireframing, Prototyping, Interface Design, Information Architecture, Component Systems, Figma, Adobe XD

FRONTEND CORE

HTML5, CSS3, JavaScript (ES6+), TypeScript

FRAMEWORKS & TOOLS

React.js, Next.js, Tailwind CSS, RESTful APIs, Git & GitHub, Webpack

EDUCATION

Bachelor of Computer Applications (BCA)

Technical University

Bachelor of Commerce (B.Com)

Commerce Institute

CORE FOCUS

- Single Page Apps (SPA)
- Pixel-Perfect UI Layouts
- Edge-Case UX States
- Performance Optimization

PROFESSIONAL PROFILE

Dynamic and detail-oriented Frontend Developer & UI/UX Designer with 2 years of professional experience crafting high-performance, user-centric web applications. Expert at building premium, intuitive single-page applications (SPAs) that seamlessly bridge the gap between clean, scalable code and beautiful visual design.

WORK EXPERIENCE

Frontend Developer & UI/UX Designer

2024 – Present

Techsite

- Spearheaded end-to-end user research, interactive low/high-fidelity wireframes, and scalable component libraries using Figma.
- Engineered highly responsive Single Page Applications (SPAs) using React.js and Tailwind CSS, improving layout loading speeds by 25%.
- Designed and executed advanced UI states for complex edge cases, including structural loading skeletons, custom offline error handling, and robust empty state components.
- Collaborated with engineering teams to assure cross-browser parity, semantic accessibility, and clean component state management.

FEATURED PROJECTS

Premium Weather Application Interface

Solo Project

- Designed a minimalist, luxury-tier modern dark & light dynamic interface focused on extreme simplicity and ease of use.
- Developed using modular React, calling async weather microservices with robust fallback handling for "City Not Found" and offline grid timeouts.
